

# Revolutionizing Asset Trading with On-Demand Tokenization

Sologenic is a groundbreaking ecosystem that connects traditional financial markets with blockchain-based assets. Leveraging the XRP Ledger's robust security and fast transaction speed, Sologenic brings a new era of digital asset trading by integrating traditional finance into the blockchain.

# Key Features

## On-Demand Tokenization

Access a diverse array of stocks from the world's Top 30 global exchanges and seamlessly trade them along with blockchain-based assets within the Sologenic Ecosystem.

## Democratized Access

Sologenic allows fractional share ownership, eliminating limitations imposed by specific tick sizes, providing greater flexibility and liquidity.

## Multiple Asset Classes, One Platform

Tokenize over 40,000 Stocks, ETFs, and Commodities from top global exchanges, and trade them against a wide range of cryptocurrencies and stablecoins on the DEX.

## 1:1 Asset-Backed Protection

The underlying assets are securely held in custody upon purchase of stock, ensuring the integrity of your investments at all times.

## 24/7 Online Trading

Traditional markets operate in different time zones but the blockchain never sleeps. Be in control and trade your tokenized assets at all times in the decentralized setting.

## Simple Sign-Up & Verification Process

Operate between traditional finance and crypto markets by completing a single KYC & AML onboarding process.

## Real-Time Dividends

Receive dividends on tokenized assets just like traditional asset holders, whether your assets are in self-custody or held on Sologenic.

## Dynamic Stock Swaps

Sologenic promptly notifies holders and provides a 30-day token swap window when mergers or buybacks occur. Easily exchange your existing tokenized assets for updated versions, and keep investments aligned with market changes.

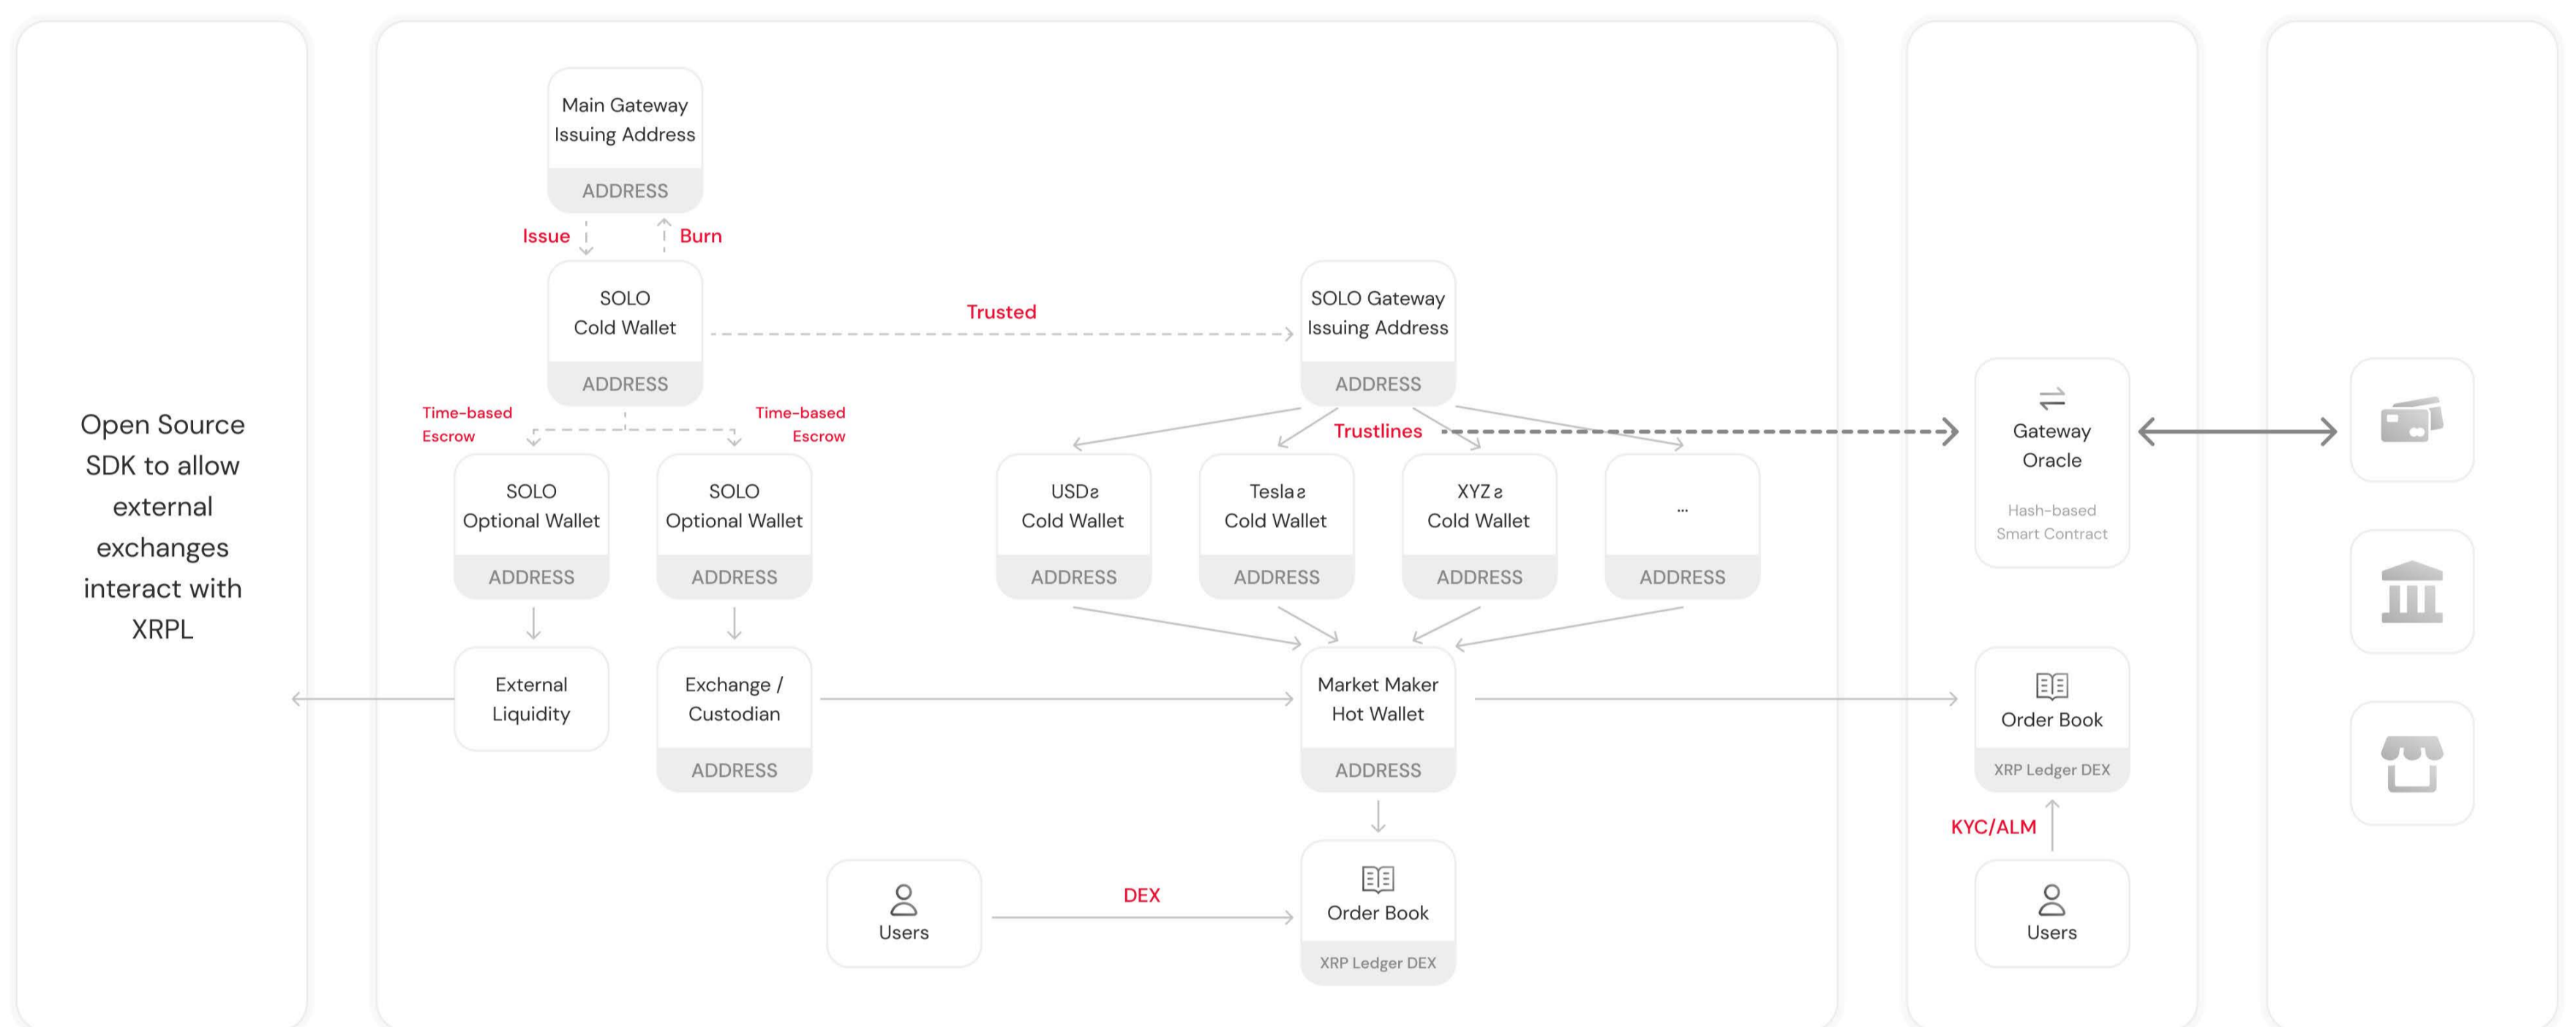

# How it Works

The **Sologenic Asset Tokenization Platform** allows users to deposit fiat, and just like a regular broker platform, engage in trading activity within various markets.

When an asset is **purchased**, it is tokenized on the Blockchain and can then be transferred to a secure, decentralized wallet to be stored and self custodied or traded at any given time on the **DEX**.

When an asset is **sold**, the tokenized counterpart is burned and the underlying asset is liquidated.

## Forge a Strategic Partnership with Sologenic

Sologenic is actively extending its global footprint and is keen to establish strategic alliances with licensed Broker Dealers across various jurisdictions. This presents a unique opportunity to integrate your operational expertise with Sologenic's advanced technological infrastructure.

As a partner, you will spearhead the launch of the Tokenized Securities Platform in your region, managing the operations while Sologenic provides the robust technological backbone. This symbiotic relationship not only leverages your license and proficiency but also places you at the forefront of the financial revolution.

To explore this opportunity further, contact our partnerships team. Together, we can redefine the landscape of asset trading and contribute to a more inclusive and dynamic financial ecosystem.
